Big Changes for Business Process Outsource Company— Mergers, New Name

**Conglomerate acquires McDonald Data Services and Data Preparation International,
becomes SecureOne Data Solutions**

PHOENIX, AZ - OCTOBER 2008 – Nelson Brooks, CFO of Data Center of Arizona (Phoenix), Cal Coast Data Entry, Inc (Los Angeles) and Data Center de Nogales (Mexico) announces the acquisition of Texas-based McDonald Data Services and Data Preparation International (both of Plano, TX) and the re-naming of the conglomerate as **SecureOne Data Solutions**. Both the merger and the name change took effect October first 2008.

The **SecureOne Data Solutions** name and logo unifies the company's five offices, formerly operating under their own names, which span three states and two countries and have served a growing global market since 1978.

Specializing in local and offshore data entry, database and file management, **SecureOne Data Solutions** prides itself as a full service back office solution provider. The additions of McDonald Data Services and Data Preparation International bring enhanced lockbox and caging capabilities (secure solutions for processing payments and donations), complete outsourcing options, as well as additional sales management staff, expanded hours and seven-day-a-week service. The company's combined personnel now exceed 450 operators, managers, customer service representatives and support personnel.

Current customers of Data Center of Arizona, Cal Coast Data Entry, Inc., Data Center de Nogales, McDonald Data Services and Data Preparation International are encouraged to contact their sales representative to answer any questions concerning their account. **SecureOne Data Solutions** anticipates no interruptions in service during this merger and name change.

Visit the company's new website, www.secure1data.com for further updates.

Data Center of Arizona:

Established in 1978, DCA provides its customers with quality solutions, excellent service and the power of a large firm - without sacrificing the personal attention expected from a small company. The combination of three offices, Cal Coast Data Entry, Inc (CCDE) in Los Angeles, Data Center of Arizona (DCA) in Phoenix and Data Center de Nogales (DCN), its offshore facility, makes it one of the Southwest's largest data entry service providers. DCA is proud to enhance its reach and services with the acquisition of McDonald Data Services and Data Preparation International.

McDonald Data Services and Data Preparation International:

McDonald Data Services (MDS) and Data Preparation International (DPI) ease the burdens of collecting and managing data for their clients by converting paper-based documents into usable electronic formats. By taking on this burden, their clients are able to shift focus from data entry to actually utilizing this valuable information. MDS and DPI, now part of the SecureOne Data Solutions family, deliver industry-leading expertise, cost savings and simplified business processes, including scanning, lockbox and caging solutions.
